

IBM PCjr Color Display Check Out Procedure

Use the IBM PCjr Color Display Check Out Procedure to make sure your IBM PCjr Color Display operates correctly.

If your display needs to be serviced, return it with the power cord.

- 1 Turn your display power on.
- 2 Is the Power-on indicator lit?

YES - Go to Step 3.

NO - See if the power cord is plugged into a working electrical outlet and into the rear of the display. If it is, have your display serviced. See "Service Information" in this section.

- 3 Turn your IBM PCjr power off.
- 4 Turn the Brightness and Contrast controls fully clockwise.

- 5 Turn the Vertical Size control fully counterclockwise. Black areas should appear at the top and bottom of the screen.

- 6** Do black areas appear at the top and bottom of the screen?

YES - Go to Step 7.

NO - Have your display serviced. See "Service Information" in this section.

7

Are the black areas at the top and bottom of the screen about the same size?

YES - Go to Step 8.

NO - Have your display serviced. See "Service Information" in this section.

- 8** Turn the Vertical Size control clockwise until the black areas at the top and bottom of the screen just disappear. If one of the black areas disappears before the other, continue to turn the control until the second black area is gone.

9 Is the screen white?

YES - Go to Step 15.

NO - Go to Step 10.

10 Turn your display power off.

11 Turn your IBM PC_{jr} power off.

- 12** Disconnect the display signal cable from the rear of your IBM PCjr.

- 13** Turn your display power on.

- 14** Is the screen white?

YES - Have your IBM PCjr serviced. See "Service Information" in this section.

NO - Have your display serviced. See "Service Information" in this section.

- 15** While watching the screen, turn your IBM PCjr power on.
- 16** Did the screen change from white to black as soon as you turned your IBM PCjr power on? (This totally black condition may last only a few seconds. Then the IBM Color Bar screen appears followed by the IBM Personal Computer BASIC Message Screen.)

YES - Go to Step 17.

NO - Have your display serviced. See "Service Information" in this section.

- 17** Wait for your IBM PCjr to finish testing itself. The IBM Personal Computer BASIC Message Screen appears with a blinking cursor.

- 18** Did the IBM Personal Computer BASIC Message Screen appear?

YES - Go to Step 19.

NO - Have your IBM PCjr serviced. See "Service Information" in this section.

19 Is the screen stable?

YES - Go to Step 22.

NO - Go to Step 20.

20 Turn the Vertical Hold control clockwise as far as it will go. Then, turn it counterclockwise until the screen stops rolling and is stable.

21 Were you able to make the screen stable?

YES - Go to Step 22.

NO - Have your display serviced. See "Service Information" in this section.

22 Does the screen have white characters on a dark background?

YES - Go to Step 28.

NO - Go to Step 23.

23 Turn your IBM PCjr power off.

24 Turn your display power off.

25 Disconnect the display signal cable from the rear of your IBM PCjr.

26 Turn your display power on.

27 Is the screen white?

YES - Have your IBM PCjr serviced. See "Service Information" in this section.

NO - Have your display serviced. See "Service Information" in this section.

28 Turn the Brightness control fully counterclockwise.

29 Did the characters get darker?

YES - Go to Step 30.

NO - Have your display serviced. See "Service Information" in this section.

- 30** Turn the Brightness control fully clockwise.

- 31** Turn the Contrast control fully counterclockwise. Did the characters get darker?

YES - Go to Step 32 .

NO - Have your display serviced. See "Service Information" in this section.

32 Turn the Contrast control fully clockwise.

Too Dim

Too Wide

Too Narrow

Too Short

Shrunk

Characters Shifted Left or Right or Up and Down Off the Display Area

Tilted

Out of Focus

YES - Have your display serviced. See "Service Information" in this section.

NO - Go to Step 34.

- 34 Adjust the Brightness and Contrast controls to a comfortable level.
- 35 Turn your IBM PCjr and display power off.
- 36 Disconnect the display signal cable from the rear of your IBM PCjr.

- 37** Turn the Volume control fully clockwise.

- 38** Turn your display power on.
- 39** Do you hear a constant hum from your display?
- YES -** Your display is working correctly. If you are having a sound problem while using your IBM PCjr, have your IBM PCjr serviced. See "Service Information" in this section.
- NO -** Have your display serviced. See "Service Information" in this section.

Service Information

If your IBM PCjr or IBM PCjr Color Display has a problem and must be serviced, do the following:

- 1 Turn your IBM PCjr, IBM PCjr Color Display, and all attachments off.
- 2 Unplug your IBM PCjr and IBM PCjr Color Display power cords from their electrical outlets.
- 3 Don't forget that the power cord, keyboard, and all side-attached options are considered part of the IBM PCjr, so you need to keep them with the system unit. You should also keep any cartridges or diskettes that were being used when the failure occurred with the IBM PCjr.
- 4 Call your place of purchase for specific instructions before bringing in your IBM PCjr or IBM PCjr Color Display.
